

# SM PRO PLATINUM WHEELS

# The SM Pro Platinum

With CNC machined hubs manufactured from aircraft quality aluminium billet, CWC 'Bulldog' stainless steel spokes and aluminium nipples, and the lightest and hardest rim on sale today, the SM Pro Platinum is one hell of a combination.

The SM Pro Aluminium rim is designed to withstand the rigours and demands of today's performance motorcycles and riding styles. Tested independently for hardness, the SM Pro is the toughest and lightest rim on the market today.

## ROCK SOLID

1.5% harder than the Excel A60 rim.

## FEATHER LIGHT

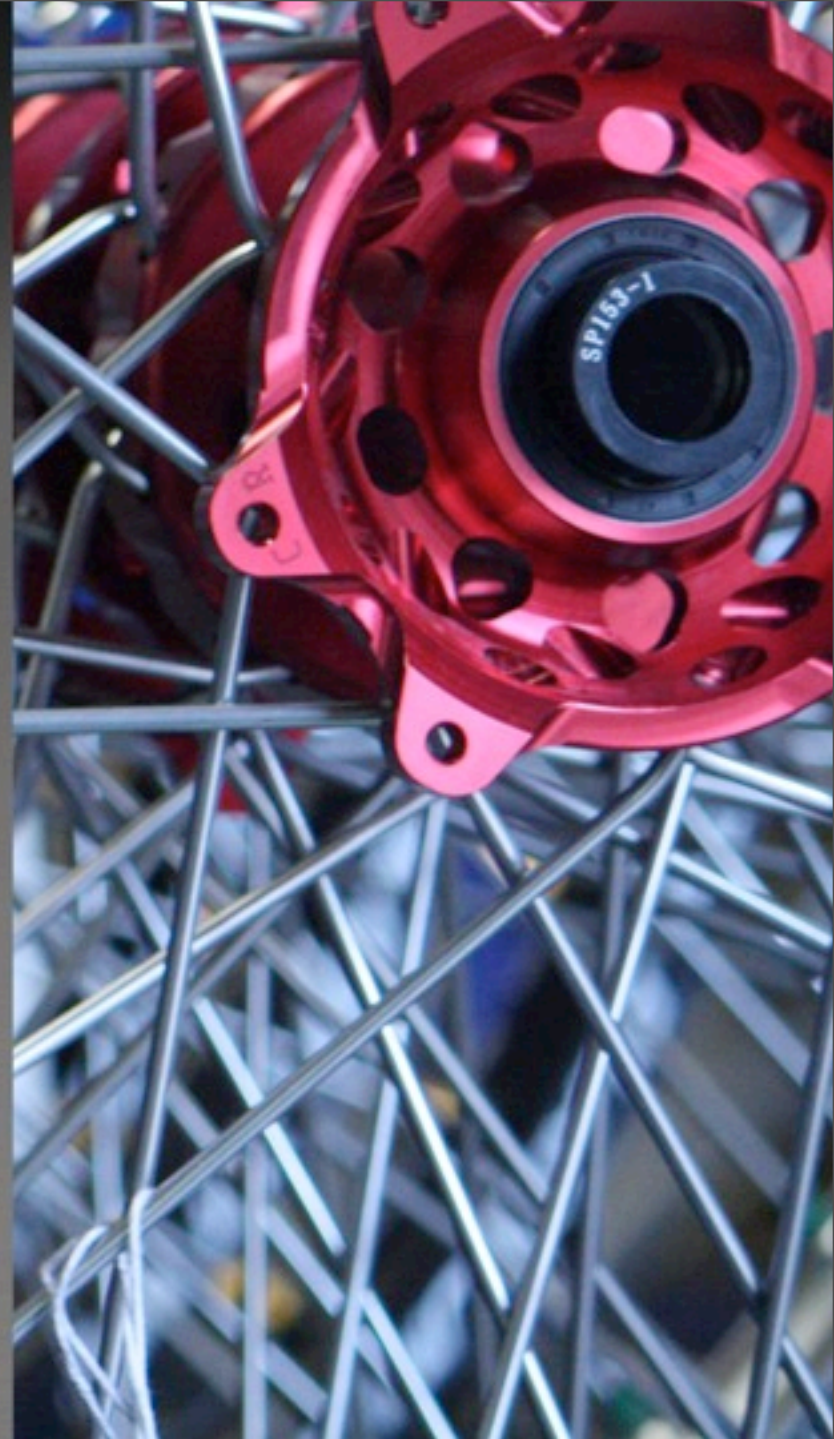

(Kg) 150g lighter than the Excel A60 rim.

[All test based on 19\*2.15 36H]

# Hubs

All machined from billet aluminium with a 36 Hole configuration to give the very best combination of strength and weight. Complete with bearings and spacers ready to fit as a direct aftermarket replacement wheel. Available in a number of anodized colours.

# Spokes

All wheels assembled with the extra strong  
“Bulldog” stainless steel spokes.

# Nipples

Aluminium nipples to gain the strongest and lightest wheel combination available in a number of anodized colours.

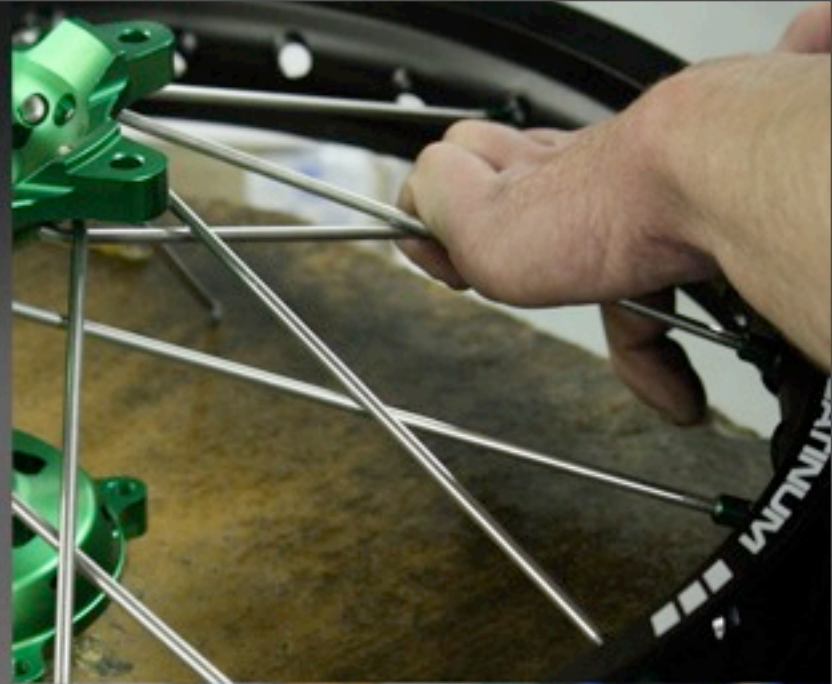

# Rims

SM Pro platinum rims are made from 7050 Series aluminium, independent tests have shown the SM pro platinum rim to be both Stronger and lighter than the Excel A60 and Takasago rims, making them probably the strongest and lightest rim on the market.

# Wheel Assembly

Having used the lightest and strongest hub, rim, spoke & nipple combination assembled in the UK by skilled craftsmen we believe that the SM Pro Platinum series wheel is the best value for money wheel on the market.

**The SM Pro Platinum Wheel  
is available in the following
